

# CAR ALARMS BLIGHT THE NEIGHBORHOOD

*We posted this on your windshield  
because your car alarm sounded off*

When you park in our neighborhood, and will not be within measurable distance of your vehicle, please turn *off* your car alarm.

Car alarms disturb our daily lives, our work and leisure time. At night, they awaken and disturb our family and others who live in our neighborhood.

The noise from screaming car alarms is nerve shattering to adults and frightening to young children. It's disgusting and intolerable.

For all the noise they make, car alarms do *not* work. They never have.

Car alarms only create a *false* sense of security. In fact, auto thieves often trip the car alarm to mask the sound of breaking glass. Thieves can disable an alarm in seconds. Residents and passers-by ignore the alarms.

Car alarms blight communities all over the country.

Companies that make and install car alarms know that their products don't work, but they continue to sell them and automakers continue to install them on vehicles as standard equipment.

There are better products on the market that will protect your vehicle and do not cause noise pollution, such as:

- Car Alarm Pagers
- Keyless Entry Systems
- Vehicle Ignition Kill Switches
- The LoJack System
- Steering Wheel and Brake Locks
- Detachable Face Stereo Dash

In addition, police departments offer VIN etching. These solutions actually work.

Please do the right thing, our family and the rest of the neighborhood will appreciate it.

Thank you very much.
